BEIDE TRAINING CENTER

Dr. Ernesto Lee

SMART

Discover the Future of Bone Regeneration with the S.M.A.R.T. Technique.

Developed by Dr. Ernesto Lee, the S.M.A.R.T. technique (Subperiosteal Minimally Invasive Aesthetic Ridge Augmentation Technique) revolutionizes the field of aesthetic dentistry through the use of laparoscopic principles. This advanced technique offers an efficient and less invasive alternative compared to traditional methods, allowing for the treatment of complex cases with vertical augmentation and better preservation of soft tissues.

What you will be able to apply in your clinic upon completing the course.

- Improved Efficiency: Reduces treatment duration and associated costs.
- Reduced Morbidity: Significantly decreases pain, swelling, and postoperative complications for your patients.
- Superior Results: Ensures predictable outcomes with a clinically proven technique, supported by detailed studies and long-term follow-up.

IN-PERSON TRAINING FOR UP TO 20 PARTICIPANTS
October 23rd and 24th, 2026 – Madrid, Spain

Experience and Recognition of Dr. Ernesto Lee

Dr. Lee has built a distinguished career as Director and Professor in various specializations at the University of Pennsylvania, including periodontal prosthesis and periodontics. With over 200 lectures given and multiple renowned publications, Dr. Lee is a leading authority in dental aesthetic techniques.

One of his most recent publications in Quintessence Publishing is titled: "Sequential Human Histology Results of the Subperiosteal Minimally Invasive Aesthetic Ridge Augmentation Technique (SMART): A Chronologic Wound Healing Proof-of-Principle Study

Program

Day 1

9:30	Registration Welcome and Introduction Why S.M.A.R.T.? Clinical Rationale Biological Basis Research and Results
11:30	Coffee break
12:00	Clinical Applications
13:30	Lunch
15:00	Technique S.M.A.R.T. Kit Hands-On #1 Surgical Video Discussion
18:00	Conclusion

Day 2

9:30	Wound Healing Evidence
11:30	Coffee break
12:00	Hands-On #2 Surgical Video Fibrin Sealant
13:30	Lunch
15:00	Complications Hands On Re-Entry
16:30	Dr. Pablo Barenblit
18:00	Certificates and Conclusion

Innovation in Implantology and Bone Regeneration

The S.M.A.R.T. technique has been presented at international forums and recognized in publications such as the International Journal of Periodontics and Restorative Dentistry. It not only represents an advance in bone regeneration but also sets a new standard in dental implantology.

Join Us for a Transformative Experience.

Don't miss the opportunity to be part of the sixth S.M.A.R.T. course in Europe, and the first one offered entirely in Spanish. Expand your skills and take your clinical practice to the forefront of modern dentistry.
